

TS-Optics T2 Filter Changer - strengthened Design

Filter exchange within seconds without having to remove camera or eyepiece - suitable for T2 connector - perfect for astrophotography - lightweight alternative to a filter wheel

- ◆ Connection at telescope side: T2 thread (female) - M42x0.75 - length 4.4 mm
- ◆ Connection at camera side: T2 thread (male) - length 4 mm
- ◆ Strengthened version, even suitable for heavy cameras
- ◆ Optical path: 18 mm (without the male T2 thread)
- ◆ Weight: only about 100 grams - the focuser is not burdened
- ◆ Images show the filter changer without the optional filter drawer
